Gorilla Mulch -50/50 Blend

Value:

Gorilla Mulch is ideal for use in planted areas and on steep slopes where its shredded texture helps keep the mulch in place.

Recommended Uses:

Top dressing for existing plants, suppressing weeds, while keeping moisture in.

Best Practices:

A minimum of a three inch application layer is recommended.

Specifications:

Gorilla Mulch is a forest product manufactured from the bark and the wood of redwood trees. It is a blend of the fibrous bark and redwood chips. It ranges in size from 1/2 to 1 inch.

Gorilla Mulch - 50/50 Blend

Gorilla Mulch components:

A blend of Ground
Redwood Bark and
Redwood chips that are 1/2"
to 1".

We can apply Gorilla
Mulch to even the steepest
slopes.
